

Opportunity Evaluation Questionnaire

Information Regarding Solid Waste

- How many tons per day are available to be processed at the plant?
- Where is the waste currently going? Are there other competing means of disposal?
- What is the heat value of the waste?
- Is the waste generated from the public or industry?
- Is there a bid process or subscription for residential and/or commercial waste flows?
- Is there a local recycling program? If so, what is recycled and in what quantities?

Information Regarding the Location of the Site for the Plant

- Where is the site located?
- What are the dimensions and elevations of the property? Who own the property?
- Is a connection to power currently available for the site?
- Is potable water available?
- Is the infrastructure in place to support transport of waste to/from the facility?
- Are there private homes/other businesses in close proximity to the site?

Economic Information

- How are garbage/trash fees collected? Does the community collect money to pay for the trash disposal through a city tax? Or is there a separate fee paid directly to the trash hauler by each household?
- What price does the municipality currently pay per ton to dispose of waste? (The "tipping fee")
- What is the market price for each Kilowatt Hours of electricity?
